

WRO Future Engineers 2026 — signal wiring v0.1 · 2026-08-05

Common ground: all GND nets tied (ESP32, mux, sensors, servo, TB6612, motor battery).

Power tree (battery, 5 V regulation, Pi 5 supply) intentionally not drawn — pending battery selection; see docs/2 §6.

[*] BNO055 drawn on mux CH4 (Round 1 firmware + original harness notes). Off-repo Round 2 code addresses CH5 — under verification before it lands.
